

Leak and Spill System

Designed for efficient disposal of loose liquids

Almost all workplaces have operations that can result in drips, leaks, splashes and spills and this can cause problems, from minor annoyances to major safety hazards.

Our Oil-Sorb Pads consist of absorbents that are designed for the single purpose of containing, picking up and assisting in the safe disposal of loose liquids. They are lighter, cleaner and easier to work with and are much more efficient compared to rags, sawdust, newspaper and even clay. Our system's efficiency makes clean-up and disposal significantly faster, easier and less costly.

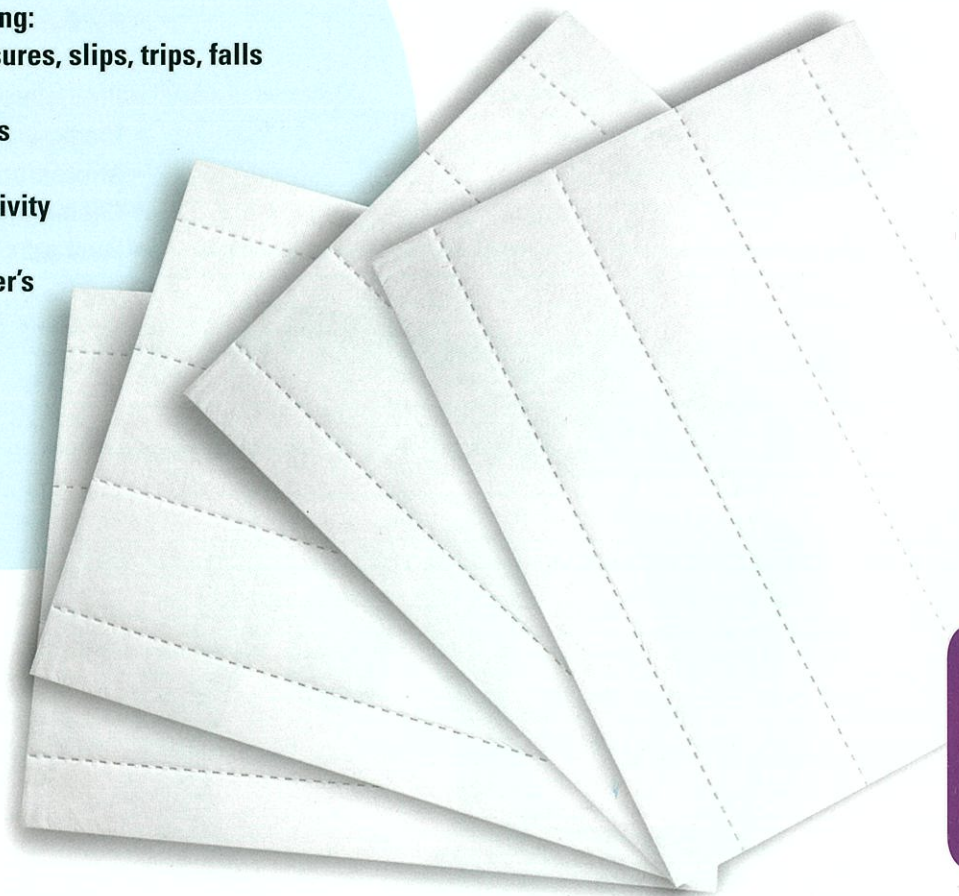

Features:

Our leak and spill system helps in reducing:

- **Safety hazards such as chemical exposures, slips, trips, falls and fire among others**
- **Damage to or contamination of products**
- **Damage to facilities and equipments**
- **Clean-up costs, downtime, lost productivity and personal injuries**
- **Damage to company's image and worker's morale**

TYPICAL USES:

- **Oil and gas industries**
- **Marine environmental protection**
- **General manufacturing areas**
